-A NEW WAY OF SPREADING THE LIGHT-

EviStyle[®]
Passion for light

Unique pieces of design in timeless shapes

TROTTOLA

It's not magic! It's physics. The speed of the turn is what keeps you upright. It's like a spinning top.

DEBORAH BULL

Collection inspired by the age-old game for children, the spinning top, both in the name and shape. The design system is similar to the MEMORIA collection, which has had a great success. Each TROTTOLA diffuser mounts a **2700K LED module** with **1400 Lumen**, powered by a **220/240 Vac driver**. The canopies are available in these versions: recessed canopy, 1 light, 2 decentralized lights, 3, 5 and 7 lights with round canopies. All the canopies are white, while the metal parts that support the glass are available in matt black or matte metallic gold.

YOU CAN CREATE YOUR OWN LAMP

The color of the glasses is not the result of a painting, but it is achieved using nanotechnology, i.e. a thin layer of metal or metal oxides realized using special machinery. The peculiarity of this technology is that the light, passing through the glass, is not reflected with the color of the glass but remains neutral.

Despite this high-technology, there could be a little difference in color between one piece and the other. This difference makes each piece unique, as if it were hand-made.

BIA

Collection inspired by the ancient Greek vases. The collection features 7 different types of canopies (all in white color) for single or multiple compositions with different shapes and colors. There are 3 different shapes in 2 different sizes. All suspensions have 230V dimmable Triac mains-voltage modules, so they don't have a driver. The final customer can dim the lamp using a special switch that he has to mount on the wall. As our first release, we have introduced only the 2700K Led version, that is the most requested one. If necessary, it is also possible to deliver a 3000K version but with not less than 30 days as delivery time.

MINERVA

Each MINERVA suspension mounts a 2700K LED module with 666 Lumen, powered by a 220/240 Vac driver. Canopies (all in white) are available in recessed version, 1 light, 2 decentralized lights, 3, 5 and 7 lights with round canopies, and the models with 3, 5 and 7 lights are also available with Push dimmer version. The frames are available in matt black or matt metallic gold.

**"The soul is dyed the color of its thoughts. Think only
on those things that are in line with your principles
and can bear the light of day"**

HERACLITUS

Collection with blown glasses realized according to the traditional Murano techniques. SC and SS glasses of the pendant versions are available in 4 colors: glossy white, crystal with gold leaf, frosted topaz inside, frosted smoke inside. The SF version, on the other hand, uses the Fog blown glass sphere which makes the lamp suitable for more modern settings.
