THE HAND MADE IN BELGIUM

Movie on www.davidts.com 

In our “technological” world where machines have replaced people, it is reassuring to know that the hand of man still has a presence and that it will always have an irreplaceable role in the world of creation.

Pierre Alechinsky

We are interested in your well-being

The choice of your interior lighting is one of your priorities and you take a lot of care over it. In this catalogue, we can help you to find many solutions for your interior lighting. You will find the right light for each room in your home.

Good lighting can make your life more pleasant, brighter and more harmonious.

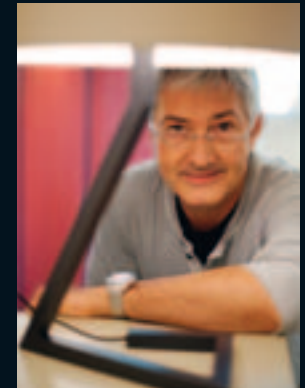

All our lamps are produced respecting traditional techniques and our manufacturing methods guarantee long-lasting satisfaction.

Our staff is composed of skilled and trusted artisans. Together we share the concern and love of work well done. When we make these lamps, we ensure their long life and their excellent quality down to the slightest detail.

Our company is, and will remain, a family one. We can offer you the assurance of continuity and a long-term guarantee of follow-up of all our products.

Trust us, we will be happy to count you among our many supporters and we will do everything we can to bring you only satisfaction.

Our only happiness is yours!

Stéphane Davidts

Tradition is a force for the future

All fixtures are made of brass, ideal support for the finest finishes. The development of the brushed bronze patina and brushed chrome gives the lamps of the Lighting Collection a most contemporary look.

The shades are available in a range of trendy colours and various materials.

A significant added advantage of this “Made in Belgium” collection, which will be greatly appreciated by professional interior designers.

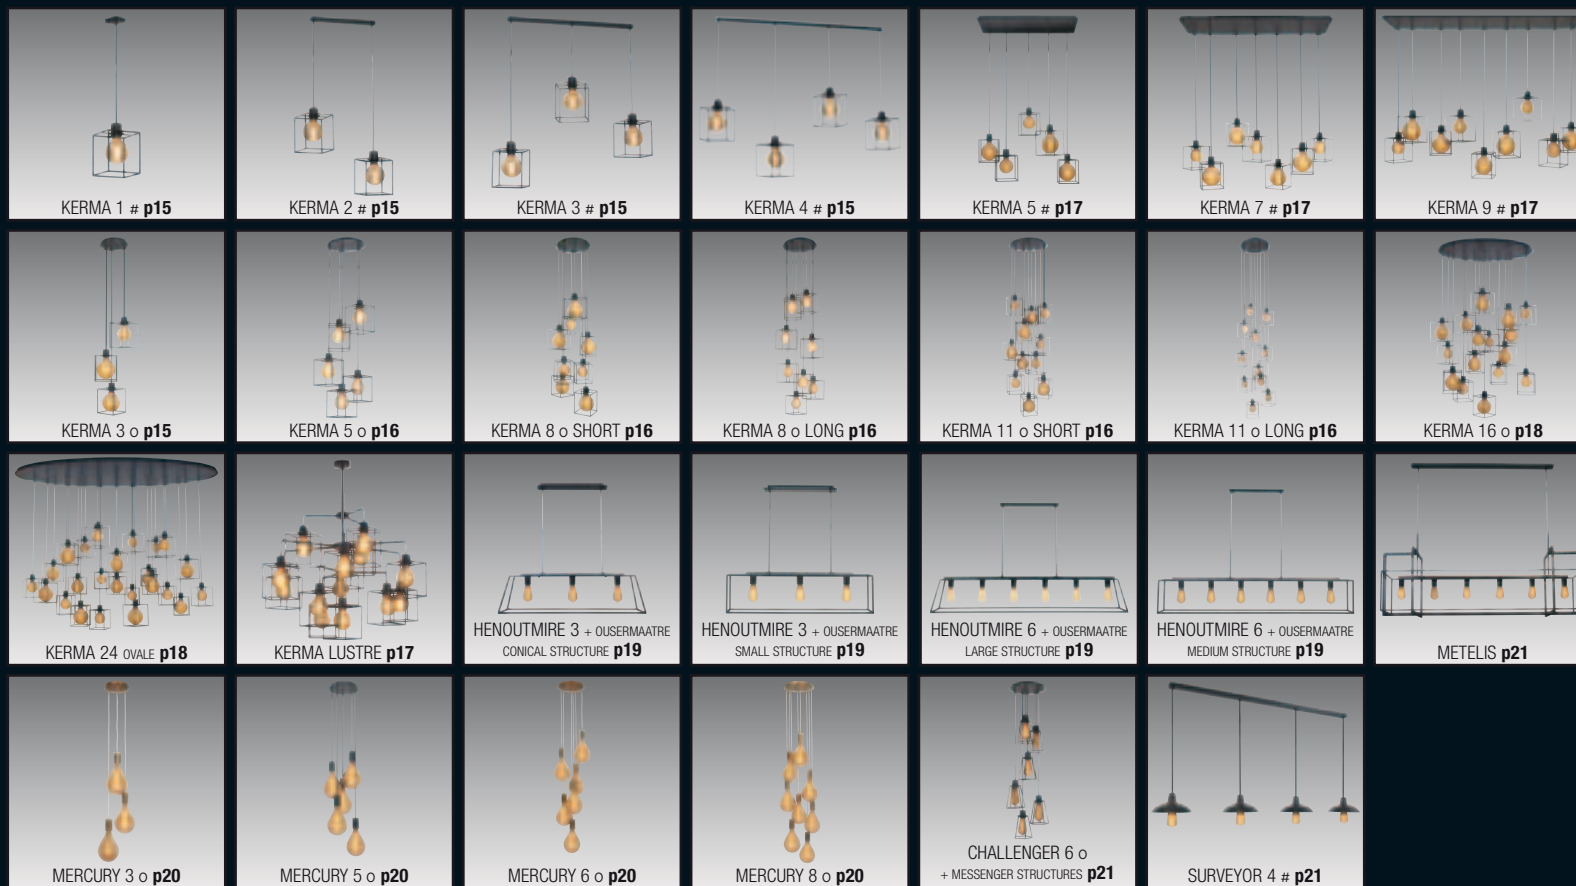

More especially as all lighting projects for public places can, if desired, be the subject of a personalised study, involving close collaboration with the customer and a broad margin for adaptation and innovation.
